

CHRISTINE E. SCHNITZLER, Ph.D.

Associate Professor of Biology

I am a marine biologist with expertise in comparative genomics and molecular and cellular biology investigating the evolution and function of stem cells in homeostasis and regeneration using a cnidarian model organism. I have experience in functional genomics tool development, fluorescence microscopy, comparative genomics, transcriptomics, computational biology, bioinformatics, and phylogenetics techniques. I regularly generate and analyze next-generation sequence data including long and short-read genomic sequencing data, as well as bulk and single-cell RNA sequencing data. I also have a strong background in experimental molecular and cellular biology research, as well as field work experience involving spawning, rearing, and manipulating cnidarian embryos and larvae. For more than 20 years, I have worked with early-diverging animal phyla, specifically cnidarians and ctenophores. I am currently culturing multiple strains of the colonial hydrozoan cnidarian *Hydractinia symbiolongicarpus* in my lab, including several transgenic lines.

My research program is centered on two main areas: comparative evolutionary genomics of cnidarians, and stem-cell mediated regenerative biology. My group is using experimental and computational approaches to explore these research areas. My lab's main research organism is the colonial marine hydroid *Hydractinia*, chosen for its exaggerated ability to regenerate any tissue throughout its life, ability to spawn thousands of eggs each week, and small and translucent nature, which makes it great for imaging. In 2019, I was awarded a \$1.566 million NSF EDGE grant (lead PI) to continue to develop functional genomics tools for *Hydractinia*, and to share resources with community members. In 2020, I was awarded a \$1.786 million NIH MIRA grant for Early Stage Investigators to explore stem cells in *Hydractinia*. I maintain strong connections across the entire cnidarian community. I am a co-organizer of the biannual Cnidarian Model Systems Meeting ("Cnidofest") which brings together over 125 cnidarian biologists across all training levels. I have co-organized monthly Cnidofest Zoom seminars, initiated during the pandemic since our biannual meeting had to be postponed. I have also helped develop web-based genome portals for several species, including the ctenophore *Mnemiopsis leidyi*, the freshwater hydroid *Hydra vulgaris*, and currently for *Hydractinia*. I mentor high school and undergraduate summer interns, PhD students, and postdoctoral fellows in my group, and serve on thesis committees for several Whitney and UF Biology graduate students. I have a versatile and highly sought-after skillset that blends experimental and computational biology and, thus, I collaborate widely with other researchers on topics related to my areas of interest. Through my collaborations, I have contributed to the fields of cnidarian developmental biology, functional genomics tool development in cnidarians, gene family evolution, and cnidarian neural system development.

Education:

2010	Ph.D. in Integrative Biology (formerly Zoology), Oregon State University
2005	M.S. in Marine Science, Moss Landing Marine Labs, California State University-Monterey Bay
1998	B.S. in Environmental Science, Northwestern University

Professional Experience:

2022-present	Associate Professor, Whitney Laboratory for Marine Bioscience, University of Florida
2016-2022	Assistant Professor, Whitney Laboratory for Marine Bioscience, University of Florida
2016-present	Guest Researcher, National Human Genome Research Institute, National Institutes of Health

Postgraduate Appointments:

- 2015-2016 Research Fellow, Computational and Statistical Genomics Branch, National Human Genome Research Institute, National Institutes of Health
PI: Andreas D. Baxevanis, Ph.D.
- 2010-2015 Intramural Research Training Award Postdoctoral Fellowship, Computational and Statistical Genomics Branch, National Human Genome Research Institute, National Institutes of Health
PI: Andreas D. Baxevanis, Ph.D.

Honors, Awards, and Fellowships:

- 2019 Kavli Frontiers of Science Fellow, Invited Participant of 4th Israeli-American Symposium
- 2014 NHGRI Award to the Genomics and Evolution Team "For producing scientific advances that shook the tree of life from its shoots to its roots"
- 2013 NHGRI Intramural Research Award given to a post-doctoral fellow "In recognition of meritorious research accomplishments for a long-term body of work of exemplary quality and significance"
- 2013 NIH Community College Summer Enrichment Program Postdoctoral Mentor Award
- 2012 NHGRI Diversity and Community Outreach Award for helping to organize and teach a genomics course at the University of the District of Columbia
- 2012 Outstanding Service Award, Intramural Training Office, NHGRI/NIH
- 2010 Zoology Research Fund Award, Oregon State University
- 2009 Zoology Research Fund Award, Oregon State University
- 2008 Oregon Lottery Graduate Scholarship, Oregon State University
- 2008 Travel Award, Genomics of Coral Reefs, 11th International Coral Reef Symposium
- 2004 Martha Johnston Memorial Scholarship, Moss Landing Marine Laboratories

Teaching and Service:

- 2022-present Co-Organizer, Cnidofest 2024 Meeting
- 2020-present Inclusion, Diversity, Equity, & Accessibility (IDEA) Committee Member, Whitney Lab, UF
- 2020-present Faculty Coordinator, Scientific Communication Group (SciComm), Whitney Lab, UF
- 2020-present Guest Lecturer, Stem Cell Course ZOO4926, University of Florida
- 2020-2022 Co-Organizer, monthly Cnidofest Zoom meetings
- 2019-2022 Organizing Committee Member, Cnidofest Meeting, UC-Davis, Sept 7-10, 2022
- 2019-present Graduate Admissions Committee Member, Department of Biology, UF
- 2019-2020 Search Committee Member, Tenure Track Wildlife Biologist, Whitney Lab
- 2018-present Grant Writing Workshop Co-Instructor (with Joe Ryan)
- 2018-2019 Search Committee Member, Tenure Track Marine Metabolomics and Proteomics Biologist, Department of Biology, UF
- 2017-2021 Lecturer for NSF REU program at Whitney Lab
- 2017- 2018 Co-Organizer, Cnidofest Meeting, Whitney Lab, Sept 6-9, 2018
- 2017-2018 Search Committee Member, Tenure Track Bioengineer/Neuroscientist, Whitney Lab
- 2017-2018 Search Committee Member, Tenure Track Molecular/Cellular Biologist, Department of Biology, UF
- 2016 Co-Organizer, Hydroidfest Meeting, Bodega Marine Lab, Sept 23-25, 2016
- 2015-2016 Co-Organizer, Ctenopalooza Meeting, Whitney Lab, March 14-15, 2016
- 2011-2014 Co-Coordinator, Genomics Course, University of the District of Columbia

Patents Held:

2008 Haddock, S, **Schnitzler, C.**, Keenan, R, McCord, R. Long-wavelength FPs. US Patent Number 7,326,771.
